

Oxygen bomb whipping mask

The oxygen bomb whipping mask's rich and dense foam cleans excess sebum and waste in pores. Also, whipping cream is soft and smooth in the form of a milky cream. When using whipped cream, it provides moisture and freshness to the skin, and vitamins and various nutrients are supplied to the skin.

Oxygen moisture and energy cream

Four types of vegetable oils help with healthy and glossy skin care. Especially, it contains Herb Water-5, which gives vitality to tired skin. It contains the chia seed extract that expands 10 times when put in water and aloe vera extract that prevents moisture leakage, strengthening the skin barrier to maintain water-oil balance.

Exfoliation / Sebum clean up

Moisturizing / Strengthen skin barrier

Oxygen revitalizing ampoule

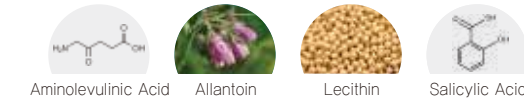

Triple hyaluronic acid helps maintain moist and elastic skin by moisturizing, water storing and protecting the skin. Organic rosewater, 4GF, and silk extracts(various amino acids) are the main ingredients that strengthen skin barriers by calming, moisturizing and nourishing about the lack elasticity skin while increasing elasticity.

ALA mask-13

A mask sheet type PDT solution
"Easy, quick and effective trouble care photosensitizer"
ALAmask-13 is a mask sheet type PDT solution exclusively for LED light sources. As it contains 5-aminolevulinic acid, it is non-irritating, so you can live your daily life without discomfort the next day after the procedure, and it maintains healthy skin without recurrence by controlling the amount of sebum in the area to be treated.

Oxygen & Anion Therapy

Oxygen & Anion's Principle of generation

O2toDerm negative oxygen ion chamber is a beauty health equipment, which uses **PSA** pressure swing adsorption filter, absorbs natural air to compress it and discards nitrogen, and releases high concentration oxygen(90% pure oxygen) through a converter, while also releasing 3 million small particle size negative ions, thus called negative oxygen ions.

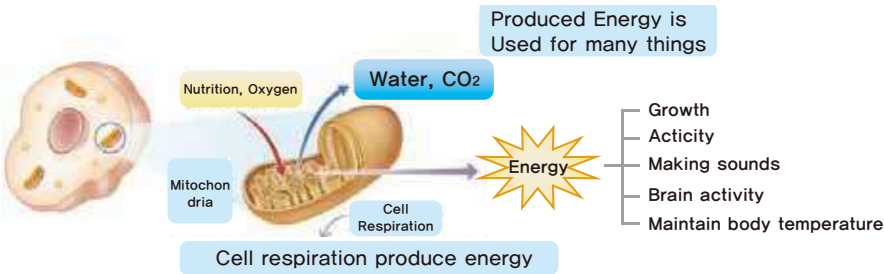

What is the PSA technology?

It is a technology that separates oxygen from various gases using the difference in adsorption power for molecular sieve.

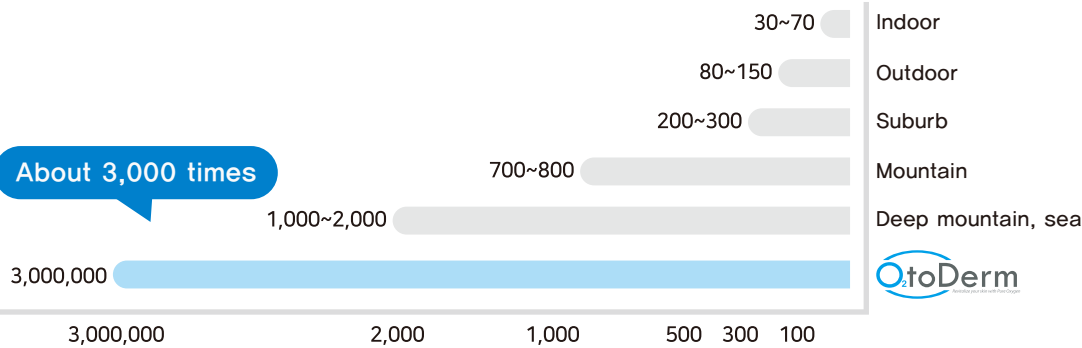

What is the Electromagnetic radiation anion generation?

By applying a pulsed high voltage to the negative electrode, the negative electron directly emits electrons into the atmosphere, which binds them to oxygen in the atmosphere to produce oxygen-anion

Effectiveness of Oxygen & Anion

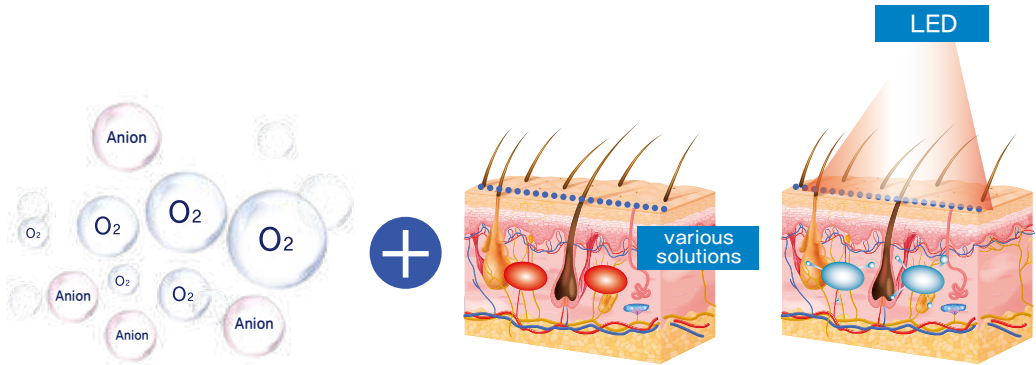

Amount of Anion generated

O2toDerm PDT

Effectiveness of PDT

Red+IR, Blue, Yellow and Green wavelengths are supplied to the skin with high concentrations of oxygen and anion called vitamins in the air to improve various skin troubles and revitalize the skin.
